

Your mission is to explore the Royal Botanic Garden Edinburgh to find special plants that need our help because they might disappear from the wild. Take pictures or selfies with each plant you find and check them off your list. When you're done, show us your pictures and ask the adult with you to write their email address on this sheet. By joining the challenge, you can enter a raffle to win cool science prizes! If we're not here when you get back, tag us on social media or email us to still be part of the raffle.

1. Wollemi Pine (*Wollemia nobilis*)

2. Chinese paperbark maple (*Acer griseum*)

3. Oblong woodsia (*Woodsia ilvenis*)

4. Wolly Willow (*Salix lanata*)

5. California Big Tree (*Sequoiadendron giganteum*)

6. Rhododendron (*Rhododendron adenosum*)

These Botanic Gardens provide a safe home for many plants, including some that are in danger of disappearing. Experimental biology research helps scientists to understand these plants better, learn more about them, and find new ways to protect them. Together we keep these plants around for many years to come!

~~Tear off and give back to SEB~~

We completed the scavenger hunt selfie challenge!

My adult helper's name is: _____

My adult helper's email address is: _____

Please don't send emails about the fun events and competitions SEB runs in the future

Wollemi Pine

Chinese paperbark maple

Oblong woodsia

What is my everyday name?	What do scientists call me?	Am I endangered?	What do I look like?	Where can you find me in the wild?	Where can you find me at RBGE?
Wollemi Pine	Wollemia nobilis	Critically Endangered in the Wild	Pine tree (Conifer)	Australia	In front of glasshouses (13)
Chinese paperbark maple	Acer griseum	Endangered	Deciduous tree	Central China	Chinese Hillside (5)
Oblong woodsia	Woodsia ilvenis	Endangered (Britain's rarest fern)	Fern (Herbaceous perennial)	Temperate North Hemisphere	Rock Garden and Stream (20)
Wolly Willow	Salix lanata	Vulnerable in the UK	Shrub	North Europe to Eastern Siberia	Rock Garden and Stream (20)
California Big Tree	Sequoiadendron giganteum	Endangered	Conifer	USA (California)	Woodland Garden Lawn Area (22)
Rhododendron	Rhododendron adenosum	Extinct in the wild	Shrub	Southwest China	Copse (9)

Wolly Willow

California Big Tree

Rhododendron
